Requests for copies of EPA comments can be directed to the Office of Federal Activities at (202) 564-7167.

An explanation of the ratings assigned to draft environmental impact statements (EISs) was published in FR dated April 05, 1996 (61 FR 15251).

Summary: EPA expressed environmental concerns regarding exiting degraded water quality and fisheries in the project area and choice of treatment method/units in alternatives. EPA recommends additional information be included in the final EIS to fully assess and mitigate for potential adverse impacts to fisheries cumulative watershed impact, timber supply and wildlife habitat.

Summary: EPA continues to express environmental objections regarding water quality and environmental justice. The FEIS responded to a number of the DEIS water quality objections in the expanded Water Quality Improvement Plan. Many of the remaining water quality objections would be addressed if the proposed operating permit incorporates requirements necessary to comply with the Clean Water Act. The proposed action potentially poses a significantly high adverse impact to cultural resources and religious practices of the tribal community. EPA recommends considering alternative dispute resolution to investigate additional opportunities for mitigating impacts to the Tribes.
